## Cuadrilla de Laguardia Rioja Alavesa

Rioja Alavesa consists of 23 villages; 15 Municipalities, 4 Administrative Boards and 4 rural towns, represented in a regional institution known as CUADRILLA DE LAGUARDIA-RIOJA ALAVESA, whose headquarters are located in the town of Laguardia. This entity also provides several services for the inhabitants of the area.

Rioja Alavesa can be smelled, seen, felt, touched... Your eyes relax as they fly over the vineyards, cereals crops and olive groves, which become a mosaic of colours when autumn spectacularly comes to the region. However, taste is the main aspect, because we are in a region with a rich gastronomic culture linked to the Mediterranean triad: bread, wine and oil.

If you go to Párganos on November 23, San Clemente, you can taste its “modest, yet delicious garlic soup, with clementines for dessert” and on February 3, the day of San Blas -the town's patron saint-, enjoy the most primitive folk dance of the entire region, the “chulalai” and sample some “hot wine.”

## Wineries

# living among barrels

Rioja Alavesa is home to 13.500 hectares of vineyards and nearly 400 wineries which produce approximately 100 million bottles of wine under the supervision and control of the Regulating Council of the Rioja Controlled Designation of Origin.

Wineries of many types constitute the heart of Rioja Alavesa. Some are located in ancestral cellars where traditional wine-making systems still predominate, or where third or fourth generation winemakers can be found who have conveniently adapted their installations but safeguarding the authenticity of the family vineyards. Other are centuries-old, stately and classic, whose names exude great reverence among connoisseurs from any land. Interestingly, some wineries boast avant-garde architectural styles with stunning shapes, which have been designed by some of the best architects in the world.

# SUSTAINABLE TOURISM

## as the basis of our philosophy

Since 2017, Rioja Alavesa has held the “Biosphere Responsible Tourism” certification, becoming the first sustainable wine tourism destination (comprising 23 towns) to be awarded this international acknowledgment.

In 2020, we began work on the Basque Country Code of Ethics, an annual competitiveness improvement programme which, drawing on international standards, aims to establish eight key principles designed to ensure that all tourism agents in the Basque Country incorporate responsibility and sustainability into their daily operations based on respect and understanding.

In 2022, Rioja Alavesa was designated and distinguished as a Smart Tourism Destination. This project is promoted by the State Secretariat for Tourism (SETUR) and managed by the State-Owned Enterprise for the Management of Tourism Innovation and Technologies (SEGITTUR) in collaboration with Basquetour-Basque Tourism Agency, which seeks to improve the competitiveness of tourist destinations and the quality of life of their residents by focusing on five pillars: governance, innovation, technology, sustainability and accessibility.

ENOCONOCIMIENTO  
RIOJA ALAVESA

**A MEETING POINT**  
to share wine tourism  
knowledge and experiences

[www.enoconocimiento.com](http://www.enoconocimiento.com)

**ENOKNOWLEDGE** originated in **Rioja Alavesa**. It arises from the concern and the need for the sector not to stagnate by seeking excellence in the increasingly developed and competitive world of wine tourism, trying to create a network of contacts and synergies between professionals in the various fields of wine tourism and trying to meet training needs at all levels.

There are four training modes: the **Enogastronomic Campus**, an intensive training course at a specific time of the year which aims to cover the various disciplines applied to the sector; the **Wine Tourism Forum**, an annual event which aims to bring professionals into contact with the latest news and the reality of the wine tourism sector, creating a network among the participants; and the **training pills** are learning days on a specific topic or concept. This is complemented with **training trips** to learn about other territories and projects that provide new knowledge and points of view to continue progressing in our region.

A field as vast as wine tourism needs a platform such as **ENOKNOWLEDGE** that allows us to advance and retrain professionally to meet and even exceed the expectations of our visitors.
