WINE  
ROUTE  
RIOJA · ALAVESA

## Welcome to Rioja Alavesa

Rioja Alavesa is a 300 km<sup>2</sup> region situated in the south of Álava between the River Ebro and the imposing Toloño Mountain Range where vines have grown since Roman times.

With a population of 12.000, Rioja Alavesa consists of 15 municipalities, 4 Administrative Boards and another 4 population centers where around 300 wineries can be found. A region where the culture of wine permeates everything; where the people see coexistence and hospitality as a way of life.

The short distances between these municipalities and the ease of access are the perfect excuse to enjoy stunning landscapes of endless vineyards, dotted with olive trees and ancient dolmens, medieval towns with their walled enclosures, stately mansions and churches of quiet beauty... and of course, an infinite number of wineries that combine tradition and modernity.

Rioja Alavesa Wine Route, consisting of more than one hundred establishments, invites you to enjoy unique experiences and discover all the hidden corners of this region.

In addition to enjoying unique experiences in vineyards and wineries and the attractive landscapes, travellers can also take pleasure in wine festivals and events, cultural visits, vinotherapy, nature activities, wine-related shopping, etc, while spending the nights among barrels and vineyards in avant-garde hotels with spectacular designs, or in country houses and hotels full of charm.

The finishing touch to a stay in Rioja Alavesa will be its cuisine, from the most traditional dishes to the delicacies of miniature cuisine, based on a type of cuisine that is faithful to our roots and blessed by a prodigious range of products; traditional products that our chefs still use today.

Always toasting with our C.D.O. Rioja wines that will unequivocally make travellers realise they are in a land, Rioja Alavesa, which has made wine and all that surrounds it its *raison d'être*.

# SUSTAINABLE TOURISM

## as the basis of our philosophy

Since 2017, Rioja Alavesa has held the "Biosphere Responsible Tourism" certification, becoming the first sustainable wine tourism destination (comprising 23 towns) to be awarded this international acknowledgment.

In 2020, we began work on the Basque Country Code of Ethics, an annual competitiveness improvement programme which, drawing on international standards, aims to establish eight key principles designed to ensure that all tourism agents in the Basque Country incorporate responsibility and sustainability into their daily operations based on respect and understanding.

In 2022, Rioja Alavesa was designated and distinguished as a Smart Tourism Destination. This project is promoted by the State Secretariat for Tourism (SETUR) and managed by the State-Owned Enterprise for the Management of Tourism Innovation and Technologies (SEGITTUR) in collaboration with Basquetour-Basque Tourism Agency, which seeks to improve the competitiveness of tourist destinations and the quality of life of their residents by focusing on five pillars: governance, innovation, technology, sustainability and accessibility.

## Cuadrilla de Laguardia Rioja Alavesa

Rioja Alavesa consists of 23 villages; 15 Municipalities, 4 Administrative Boards and 4 rural towns, represented in a regional institution known as CUADRILLA DE LAGUARDIA-RIOJA ALAVESA, whose headquarters are located in the town of Laguardia. This entity also provides several services for the inhabitants of the area.

Rioja Alavesa can be smelled, seen, felt, touched... Your eyes relax as they fly over the vineyards, cereals crops and olive groves, which become a mosaic of colours when autumn spectacularly comes to the region. However, taste is the main aspect, because we are in a region with a rich gastronomic culture linked to the Mediterranean triad: bread, wine and oil.

This winery is the result of the work of a family with a long winemaking tradition. It was founded by Luis Javier Larrea, who has passed on the knowledge and secrets of making good wine to his family; a process that starts with the care of the 50,000 vines that make up the "La Romañíguez" family vineyard, which combined with the terroir, the privileged microclimate of Rioja Alavesa, the careful harvesting of the fruit and a painstaking winemaking process results in wines with a unique personality that seduce consumers.

BASQUE COUNTRY

Rioja Alavesa has over one hundred establishments (including restaurants, pintxo bars, wine cellars, accommodation, etc.) that belong to Euskadi Gastronomika, a gastronomic tourism club, the ultimate purpose of which is to provide you with the best experiences, excellent gastronomic offers and high quality services.

As you know, Basque cuisine, from traditional to the most innovative, is one of the distinguishing features of the Basque Country. Our cuisine crosses borders and is recognized and praised in the international arena. One of its secrets is the excellence and diversity of the ingredients obtained from the land and the sea. Now, Euskadi Gastronomika has put in place a range of requirement and commitments - that all the members involved accept - in order to offer you an exceptional level of quality.

The Wine Route of Spain project was established in 2001, when ACEVIN, the Association of Spanish Wine Cities, obtained the necessary support to begin working on designing and developing the standards that would regulate the quality of a tourist product designed to generate memorable experiences for travellers looking for a new concept of tourism based on the culture of wine.

Since then, the work performed has helped consolidate a top-quality tourist brand, which is a national and international point of reference when we talk about wine or wine tourism and that integrates around 40 wine regions, including Rioja Alavesa.

Since 2005, the Rioja Alavesa Wine Route has been certified as a Wine Route of Spain, which means that it regularly provides proof of compliance with the quality and product criteria established by ACEVIN and the Secretariat of State for Tourism, as set out in the Wine Route of Spain Tourism Product Manual, making these routes different from other wine-tourism proposals and providing travellers with ease of mind.
